NADCAP CERTIFICATION: 10959191916

LICENSING AGREEMENTS

Keep moving forward and let Thomas handle the past.

OEM LICENSING AGREEMENTS

Thomas Instrument implements Licensing Agreements with Original Equipment Manufacturers (OEMs) that allow the OEM to maintain design rights...and profits...without the burden of production responsibilities. OEMs license Thomas to manufacture and sell their product(s) directly to the customer, eliminating further asset utilization.

Licensing agreements are particularly well suited for OEMs who have diversified, or are experiencing manufacturing, workload or cost / profitability limitations. Let Thomas support your legacy products while you focus on current and future production demands.
